

Coding club meeting 25/05/17

Attending: Luke Stevenson, Sam Lee, Varun Venkatesh

1. **Meeting of club time:** Confirmation of mutually acceptable time and place to start, the group agreed upon 5pm on Wednesdays
2. **Communication:** Agreeded to do our communications through our facebook page and also included the usage of a git hub to upload and have guides on. SL will be in charge of updating the git hub. VV will re learn skills to adminster and help.
3. **Syllabus.** We agreeded upon a general syllabus for begining coders primarily with introduction points for more advanced coders, and confirmed that VV would write a short syllabus to direct people to where they could start.
4. **Club content.** Content for the next two meetings of the coding club is free choice but we have agreeded to avoid python and will encourage people to focus on learning bash or git or installing necessary programs.
5. **Combine.** We have all confirmed with Roi that we'll be around to help, SL will be away that week but is happy to help and we are awaiting his emails.
6. **Advertisement.** We have agreeded to minimise advertisement to primarily the SBS grads list and the people Melanie specifically wished to notify and will extend from there. The first meweting of the club is Wednesday the 31st May and LS will send an email around notifying.

Action point summary:

- SL will spearhead the update of the git hub
- VV will write a small syllabus to direct people
- SL, and VV will update some resources onto the githubt including finding a github tutorial, basic bash and installing appropriate program tutorials.
- LS will notify people of the club via a grads list email.
- VV will book the room (OK501) ample sapce for fluctuating groups, may need to get some powerboards.
